Antonio Kadić

Product Engineer

End-to-end product engineer building backend systems, desktop applications, integrations, and operator-facing software from architecture through production delivery, using AI-native and agentic development workflows to accelerate implementation and iteration.

WORK EXPERIENCE

Independent Product Engineer
July 2025 - Present

- Designed and built a production hospitality POS system spanning Raspberry Pi-hosted local services, Windows desktop runtime, messaging, sync, tax-compliant receipt workflows, and operator-facing product flows.
- Defined backend contracts and local runtime architecture for desktop POS, waiter, and kiosk clients using REST, MQTT, PostgreSQL, and cloud synchronization.
- Implemented sectioned sync, secure device bootstrap, two-level authentication, and real-time coordination across a LAN-connected register cluster.

Software Developer | Stratus IT d.o.o.
September 2021 - June 2025

- Built production features and internal tools for a yacht charter booking and back-office management platform, including mobile-first booking and trip workflows.
- Delivered REST services, external integrations, real-time chat, and multi-channel notifications across Firebase Cloud Messaging, Firestore, MQTT, and email while working directly with clients, support, and product stakeholders.

EDUCATION

Technical School Ruđer Bošković
September 2009 - May 2013

- Computer Technician

LANGUAGES

- Croatian: native
- English: C1

SKILLS

Backend

- Java · Spring Boot · Spring Security
- JPA (Hibernate, EclipseLink)
- PostgreSQL · Elasticsearch
- Apache Ignite
- REST · SOAP
- MQTT · EMQX
- JWT

Frontend and UI

- React · Next.js · TypeScript
- JSF · PrimeFaces
- Web Workers · OffscreenCanvas
- UI, UX, and interaction design

Desktop and Native

- Rust · Tauri
- SQLite
- Windows device integration

Infrastructure and Operations

- Docker · Docker Compose
- NGINX · Tailscale
- AWS S3 · Backblaze B2
- Raspberry Pi deployment and operations
- Bash · shell scripting
- Python
- OpenSSL · X.509
