Antonio Kadić

Product Engineer

End-to-end product engineer building backend systems, desktop applications, integrations, and operator-facing software from architecture through production delivery, specializing in systems that must operate reliably under real-world constraints including device coordination, offline-safe behavior, sync and recovery flows, and touch-first runtime environments.

WORK EXPERIENCE

Independent Product Engineer
July 2025 - Present

- Built a production hospitality POS platform across Raspberry Pi local services, a Windows desktop client, tax-compliant receipt flows, and operator workflows.
- Defined backend contracts and runtime architecture for POS, waiter, and kiosk clients, and built a Tauri desktop app with Rust, React, TypeScript, SQLite, and Windows device integration.
- Implemented offline sync, secure device bootstrap, and real-time coordination across a LAN-connected register cluster using REST, MQTT, and PostgreSQL.

Software Developer | Stratus IT d.o.o.
September 2021 - June 2025

- Built production features and internal tools for a yacht charter booking and back-office management platform, including mobile-first booking and trip workflows.
- Delivered REST services, external integrations, real-time chat, and multi-channel notifications across Firebase Cloud Messaging, Firestore, MQTT, and email while working with clients, support, and product stakeholders.

EDUCATION

Technical School Ruđer Bošković
September 2009 - May 2013

- Computer Technician

LANGUAGES

- Croatian: native
- English: C1

SKILLS

Backend

- Java · Spring Boot · Spring Security
- JPA (Hibernate) · JWT
- PostgreSQL · Elasticsearch
- REST APIs · SOAP
- MQTT · EMQX

Frontend and UI

- React · Next.js · TypeScript
- Web Workers · OffscreenCanvas
- UI, UX, and interaction design

Desktop and Native

- Rust · Tauri
- SQLite
- Windows device integration

Infrastructure and Operations

- Docker · Docker Compose
- NGINX · Tailscale
- AWS S3 · Backblaze B2
- Raspberry Pi deployment and operations
- Bash · shell scripting
- Python
